ECO SACHET with magnesium for ECO LAUNDRY

bioExpert

NATURALNIE • BEZPIECZNIE

For use in all types of washing machines. Effective at low and high temperatures, in hard and soft water

ECO SACHET with magnesium for ECO WASH contains specially crafted magnesium.

Magnesium reacts with water and produces hydrogen bubbles transform into magnesium hydroxide and as a result turning water into weakly ionized alkaline water with a pH of about 10.5

Alkaline water acts like a soap, breaking down dirt and fat and creating unfavorable living conditions for bacteria
