

# DATA CENTER

## Data center optimization and cleaning services.

We offer to our customers a number of complex solutions for Data Centers in order to meet the market demands. They enable you to control financial inputs, make Data Center management more efficient and fully take advantage of the chances presented by the market

From the beginning of our activity, we have realized dynamic growth, presenting our offer nationally and internationally. Our knowledge, experience and market position are confirmed by numerous certifications, including ISO 9001:2015-10, ISO 27001:2022, ISO 14001:2015, AQAP 2210:2016.

## KoldBlox - reliable solutions for data center

Experience, knowledge and customer's loyalty allowed us to achieve a firm market position as a provider of Data Center solutions. We are capable of maintaining large projects where we implement the newest modern technologies.

Our strategy is to broaden our competences and provide constant development, which resulted in introducing an innovative Data Center product to our range of products under the brand name KoldBlox.

## DATA CENTER Products

- ✓ Data center airflow management: floor grommets, blanking panels for rack cabinets, cold aisle containment curtains and air baffle systems.
- ✓ Energy management: busbars, PDU.
- ✓ Management software.
- ✓ EXAGATE monitoring systems.
- ✓ Server lifters.

We are the European leader in the implementation of data center cleaning services (we were awarded by the British magazine Markets Monthly: Best IT company 2017 Award for Excellence in Data Centre Cleaning - Poland).

## DATA CENTER Services

### ✓ Data center cleaning service.

Thanks to our service, the risk of equipment failure caused by smoke or dust is completely eliminated. We have modern, certified equipment and qualified staff.

### ✓ Infrastructure and environmental conditions audits.

We check the existing cooling condition and define the ways for optimizing the data center infrastructure. After the internal control is completed, we present a detailed recommendations.

### ✓ Data center infrastructure inventory.

We provide a comprehensive infrastructure inventory service consisting of describing all devices and rack cabinets.

### ✓ Infrastructure tests under artificial load.

The services are carried out in cooperation with the Association of Polish Power Engineers. The report contains photos and videos of the tests along with a detailed description of the work carried out.

### ✓ Data center management and reporting outsourcing.

We offer 24/7/365 monitoring of the customer's data center, professional equipment and many years of experience of our engineers.
