

DATA STORAGE

Data archiving and data protection. Tape media and LTO libraries.

We guarantee comprehensive solutions in the field of archiving and securing data by providing reliable solutions.

We also provide media labeling, data migration and backup vaulting services.

From the beginning of our activity, we have realized dynamic growth, presenting our offer nationally and internationally. Our knowledge, experience and market position are confirmed by numerous certifications, including **ISO 9001:2015-10, ISO 27001:2022, ISO 14001:2015, AQAP 2210:2016.**

actidata - safe data archiving

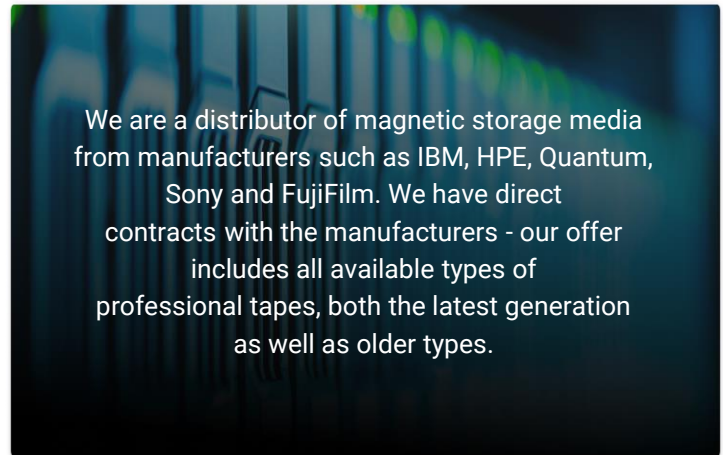

We are the exclusive representative of actidata Storage Systems in CEE (Central East Europe). Since 2019 we have been also a representative of this manufacturer in Poland and CEE countries. The actidata portfolio includes tape libraries, disk and hybrid solutions. We offer our Customers both distribution and service of these devices throughout Eastern Europe.

actidata 
We care about data

DATA STORAGE Products

- ✓ LTO tapes (and older tape standards) for backup with individually personalized barcodes from Tri-Optic.
- ✓ Cabinets and cases for the safe transport of data carriers.
- ✓ Specialized fireproof safes for storage media.

DATA STORAGE Services

✓ Backup vaulting.

We offer a comprehensive storage and archiving services of data media to which the customers have an access, if necessary. That way, they don't have to worry about transporting, storing, managing and recovering their backups. We store the media in certified safes, ensuring 24-hour monitoring via a vision system.

✓ Repair / service of tape drives and libraries.

We specialize in comprehensive repair and post-warranty service of tape drives and libraries. We respond quickly to every report and try to solve the problem as quickly as possible.

✓ ✓ Labelling of data storage media

We offer a service of labeling magnetic tapes with professional, personalized Tri-Optic barcodes. The works are carried out in our R&D center, taking into account international safety standards.

✓ Data migration

The data migration service is dedicated to the Customers who want to transfer data stored on tapes from the same technology to a newer one (e.g. from LTO3 to LTO9) or from one technology to another (e.g. from SLR to LTO tapes). The services are provided by an international team of experts.
