PRODUCTION- SERVICES- RETAIL/WHOLESALE OFFER

Dear Sirs/Madams!

We are proud to introduce to you our general offer for bolts, forgings and other fasteners made according to order and from stock.

JASŁOMET is one of leading Polish producers of connective parts, especially concerning particular products made according to drawings and untypical products.

For more information we invite you to visit our web site: www.jaslomet.pl

PRODUCTION OFFER*:

- **Bolts sized from M10-M12 up to M90,**
- Untypical screws, even in relatively small quantities,
- **Forgings weighting from 0,05 kg to 3 kg, including ones made for motorization needs,**
- We also offer mechanical processing of our forgings,
- **Bolts made according to drawings,**
- Studs and threaded rods,
- Fasteners made for operation at elevated temperatures and in pressure vessels
- **Building/construction bolts and anchors,**
- T- bolts and fit- bolts
- **Eye bolts,**
- Trapezium threaded rods with unrestricted thread length,
- **Rivets from Ø 10 up to Ø 36,**
- **Mechanical properties of our products meet the requirements of classes: from 3.6 to 12.9 according to norm PN/EN, DIN and others,**
- For our production we use carbon and alloy steel. Our products can be galvanized.
- **We take up difficult and urgent production subjects, offering fast execution terms.**
- **100 % of our production is made from certified, European steel.**
- Quality of our products is validated by quality certificates.

TRADING OFFER:

- **Our company also specializes in making complete batches of connective parts according to our clients needs chosen from more than 15.000 assortments in our stock.**

OFFER FOR SERVICES:

- **Thread rolling on client supplied elements,**
- Machining, forging and other machine related services,
- **Shot blasting and grinding**

*** The above offer does not show all production capabilities of our company, that is why we encourage sending inquiries in case of need. We will surely reply in a short time!**

PRICING:

The prices depend on ordered quantity, manufacturing standard, strength class and surface finishing - for example, galvanized or hot dip galvanized.

At your request, we quote current prices of the products you need, or make price calculations on the basis of the product summary, including manufacturing standard, size, surface finishing (galvanized or other) and quantity.
